

# NASA-Sponsored FIU Undergraduate Summer Hurricane Education/Research Paid Internship

## Aug. 12-23, 2013

- Work directly with Meteorology Professors and Graduate Students
- Hands-on research experience in hurricane monitoring and forecasting using remote sensing data
- Visit the Hurricane Research Division (HRD) and interact with leading hurricane researchers
- Two week period during Aug. 12-23, 2013, includes \$200 paid stipend

**Selected applicants will learn the basics of hurricane research data acquired from remote sensing instruments and aircraft observations by working directly with scientists in the research and forecasting communities.** Students will have the **opportunity to analyze data and present results to the FIU community.** This internship is open to undergraduate students (Freshmen-Seniors) interested in hurricanes. Women and minorities are encouraged to apply.

Applications are due by **May 15, 2013 (space is limited and we encourage you to apply earlier)** and should include:

- Resume
- Unofficial transcript (from MyFIU)
- A **brief** 1-2 page interest statement describing your background, related experiences/ accomplishments, career aspirations, and the reasons why you are interested in this internship.
- Mention any summer classes and/or other possible schedule conflicts during August.
- Email applications to Cheng Tao (ctao003@fiu.edu) or deliver to PC-329.
- Contact Cheng Tao or Joe Zagrodnik (jzagr001@fiu.edu or 305-348-7391) with any questions.
